Energy Trade Organization National Ocean Industries Association (NOIA) Praised Trump Actions, Arguing The Offshore industry "Successfully Operated" Prior To Deepwater Horizon-Spurred Regulations. "National Ocean Industries Association NOIA President Randall Luthi has welcomed the Trump Administration's Executive Order revoking the 2010 National Ocean Policy. He said: 'NOIA welcomes today's Executive Order addressing policy for the nation's oceans, particularly as it addresses the previous Administration's National Ocean Policy and its Marine Spatial Planning (MSP) initiative, which caused consternation, uncertainty, and concern for the offshore energy industry and other ocean stakeholders. The offshore oil and gas industry and many others have largely viewed the MSP initiative as an uber-bureaucratic 'solution' to a government self-imposed problem. In addition, not all stakeholders and activities were treated equally in the zoning process. The offshore energy industry has successfully operated side by side with other ocean users, without major conflict, guided by the planning inherent in the five-year offshore national program and the leasing process mandated by the Outer Continental Shelf Lands Act.'"
